The box on the left displays a **snapshot** of the current market conditions.

The graph on the right displays the overall **occupancy** and effective **rental prices** over the past 24 months. These statistics are derived from a continuous survey of all apartment communities. Effective rental prices are calculated net of concessions and utility adjustments.

The table below lists the 5 **hottest submarkets** in the Greater San Antonio area. There are a total of 15 submarkets, and the ranking is based on the best combination of rental rate growth and absorption over the past 3 months.

History of Effective Price & Occupancy

The table below distributes and analyzes **concessions** (specials) by classification. Concessions generally are represented by three types of specials: move-in, months free, or floorplan. ApartmentData.com captures the effect of these specials and prorates them over a lease term to arrive at a percentage reduction in market or street rents.
